

LARGE SYNOPTIC SURVEY TELESCOPE

A detailed technical cutaway drawing of the LSST telescope structure, showing the complex internal framework, support beams, and various components. The drawing is rendered in a light blue line-art style, providing a clear view of the telescope's internal architecture. A small human figure is visible at the bottom left for scale.

LSST Funding Acknowledgements: Requirements and Boilerplate Language

1 Introduction and Scope

The LSST Funding Acknowledgements document outlines LSST's obligations as a federal funds grantee to acknowledge the source of its funding in all publications based on or developed under the project. The responsibility to ensure proper funding acknowledgement rests with each LSST team member.

The document also provides boilerplate funding acknowledgement language, and variations tailored for websites, posters, social media and manuscripts, to be used by such publications' authors. Work carried out in "Science time" funded by LSST through the National Science Foundation or the Department of Energy should also follow the below acknowledgement statement(s).

2 NSF Grantee Obligations

2.1 Acknowledgement of NSF Support: Publications

Unless otherwise provided in the grant, the grantee is responsible for assuring that an acknowledgment of National Science Foundation (NSF) support is made. Department of Energy (DOE) acknowledgement is also included for completeness.

- i. in any publication (***including Web pages***) of any material based on or developed under this project, in the following terms:

"This material is based upon work supported by the National Science Foundation under Cooperative Agreement 1258333 managed by the Association of Universities for Research in Astronomy (AURA), and the Department of Energy under Contract No. DE-AC02-76SF00515 with the SLAC National Accelerator Laboratory. Additional LSST funding comes from private donations, grants to universities, and in-kind support from LSSTC Institutional Members."

- ii. ***NSF support also must be orally acknowledged during all news media interviews***, including popular media such as radio, television and news magazines.

2.2 Disclaimer

The awardee is responsible for assuring that every publication of material (***including World Wide Web pages***) based on or developed under this award, except scientific articles or papers appearing in scientific, technical or professional journals, contains the following disclaimer:

"Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation."

2.3 Acknowledgement of NSF Support: Other than Publications

In addition to the provisions of the CA-FATC article title "Publications" included above, sponsorship of the NSF in the project shall be set forth on any signs identifying the Project locations. The National Science Foundation emblem and name shall be prominently displayed on Project facilities and equipment. The emblem and name shall be one inch or larger in size than those of any non-NSF support source.

3 Acknowledgement of Support: DOE

The standard format for acknowledging DOE support in peer-reviewed articles and technical papers as well as news releases, public-facing web, mailing, and social media is found on the Office of Science homepage under the heading "Funding Opportunities":

<http://science.energy.gov/funding-opportunities/acknowledgements/>

4 LSST Boilerplate Acknowledgements

Two forms of an acknowledgement statement are offered, both meet federal requirements but are intended to accompany different types of information as indicated in the section headings.

4.1 Press Releases, Websites, LSST E-News

Financial support for LSST comes from the National Science Foundation (NSF) through Cooperative Agreement No. 1258333, the Department of Energy (DOE) Office of Science under Contract No. DE-AC02-76SF00515, and private funding raised by the [LSST Corporation](#). The NSF-funded LSST Project Office for construction was established as an operating center under management of the Association of Universities for Research in Astronomy ([AURA](#)). The DOE-funded effort to build the LSST camera is managed by the SLAC National Accelerator Laboratory ([SLAC](#)).

The National Science Foundation ([NSF](#)) is an independent federal agency [created by Congress](#) in 1950 to promote the progress of science. NSF supports basic research and people to create knowledge that transforms the future.

4.2 Manuscripts

This material is based upon work supported in part by the National Science Foundation through Cooperative Agreement 1258333 managed by the Association of Universities for Research in Astronomy (AURA), and the Department of Energy under Contract No. DE-AC02-76SF00515 with the SLAC National Accelerator Laboratory. Additional LSST funding comes from private donations, grants to universities, and in-kind support from LSSTC Institutional Members.

4.3 Additional Acknowledgement for Manuscripts

Manuscript authors may augment the information presented above as their individual circumstances require. For example: "This material is based on work supported by [funding agency from which author is receiving support] under [Grant/Award/Contract number]" may be appended to the LSST manuscript

acknowledgement.

4.4 Posters

Conference posters should carry the standard acknowledgement footer which has been developed following the proportions mentioned in 2.3, it is available on LSST project pages: <https://project.lsst.org/documents/stock-slides-templates>. It should be placed on posters containing work based on or developed under this award.

4.5 Social Media

In Social Media posts #NSFfunded may be used. Where the post is predominantly about the LSST camera the text of the social media post can include DOE and SLAC, there is no hashtag used or needed.

4.6 Models and Images

The following acknowledgements should be used to acknowledge funding agencies when using images, videos or models.

Long version:

LSST model provided by the LSST Project Office, with financial support from the US National Science Foundation (NSF) and the US Department of Energy (DOE) Office of Science. The NSF-funded LSST Project Office for construction is managed by the Association of Universities for Research in Astronomy (AURA). The DOE-funded effort to build the LSST camera is managed by the SLAC National Accelerator Laboratory (SLAC).

Short version:

LSST model provided by the LSST Project Office / NSF / AURA
